

SMART elements in the development of municipalities

Case study Slavičín

Tomáš Chmela

Mayor of Slavičín

Slavičín

October 28th, 2022, Lednice

CoR Conference

Slavičín

Why is it important to be „SMART“?

Improving life quality

Improving efficiency of municipal leadership

Attractive town

Getting
young
people to
stay in rural
area

Sustainable development

Increasing competitiveness

Possibility of significant savings

Slavičín

SMART řešení pro lepší život

Strategie SMART city

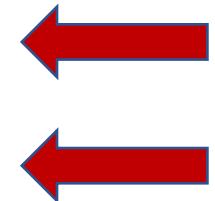

Cirkulární ekonomika

Sdílená elektromobilita

Projekty participace občanů

Open Data Portál

GIS portál a pocitové mapy

„SMART“ activities in Slavičín

- Strategic management and innovation management projects of the Operational Programme Employment (ESF)
- Modern tools of communication (mobile application, „smart“ newspaper and more)
- Participative budget „Zlepšujeme Slavičín“ (Improve Slavičín)
- Cooperation with the corporate sectors (local companies) and universities
- Activities in the field of energy industry and sustainable development – re-use concept

Slavičín

The role of Strategic Planning

- Succesfull and efficient strategy?
- Basic reccomendations from Slavičín: short, participative and SMART

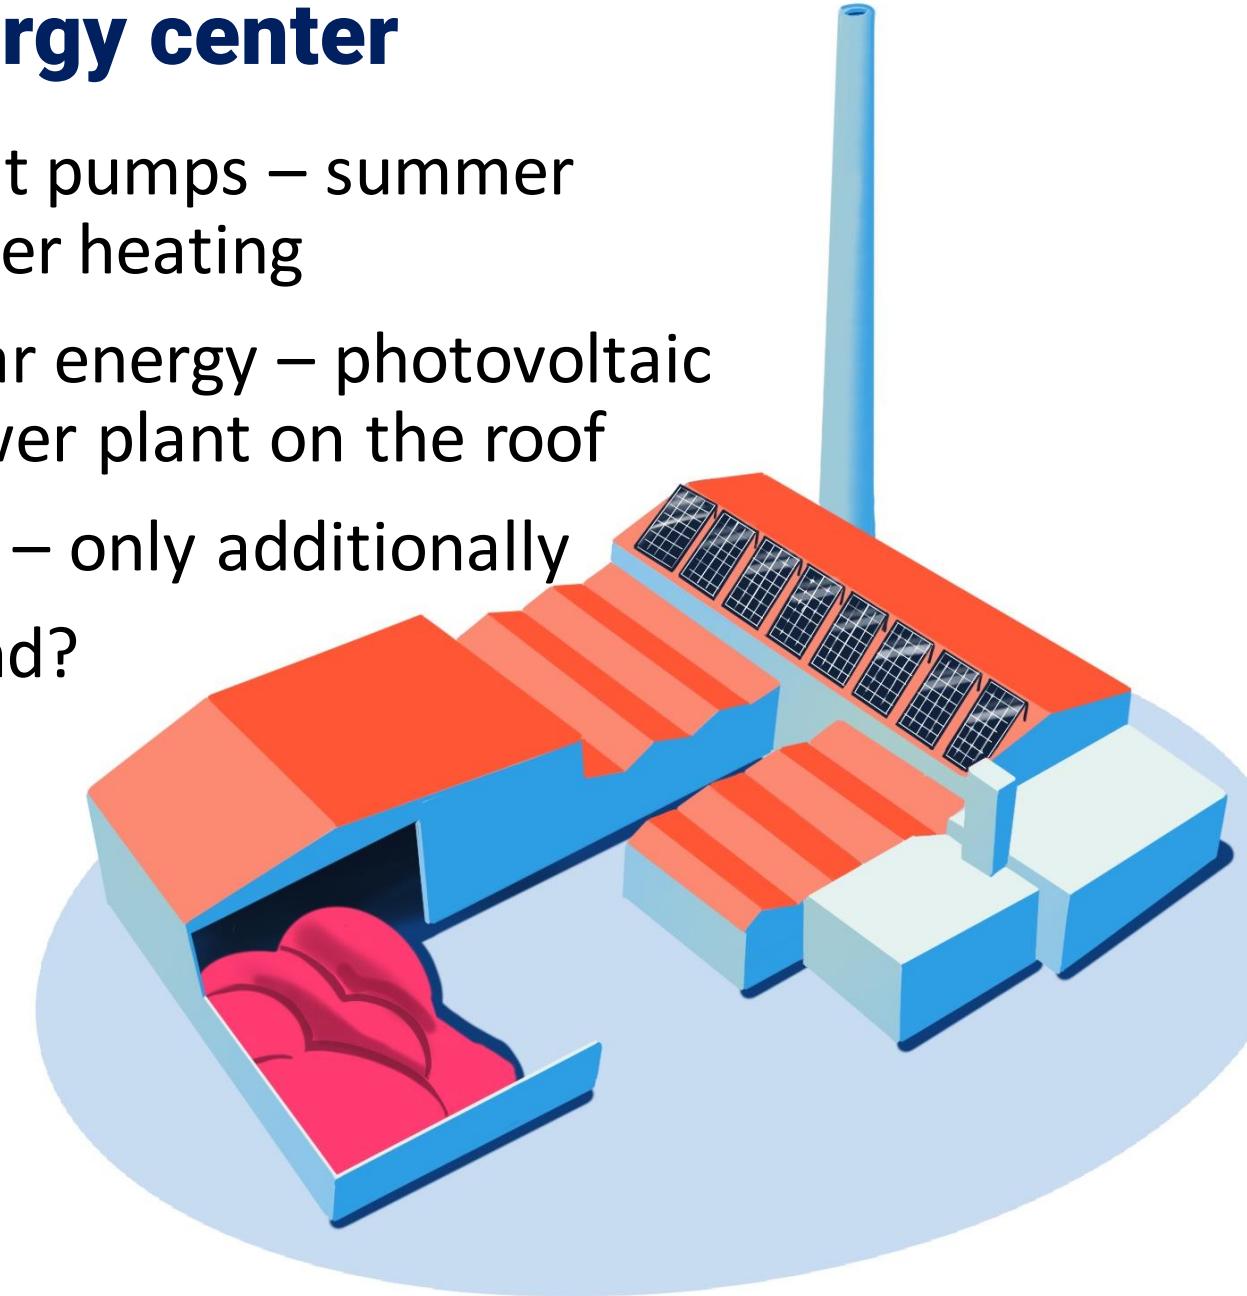

Slavičín

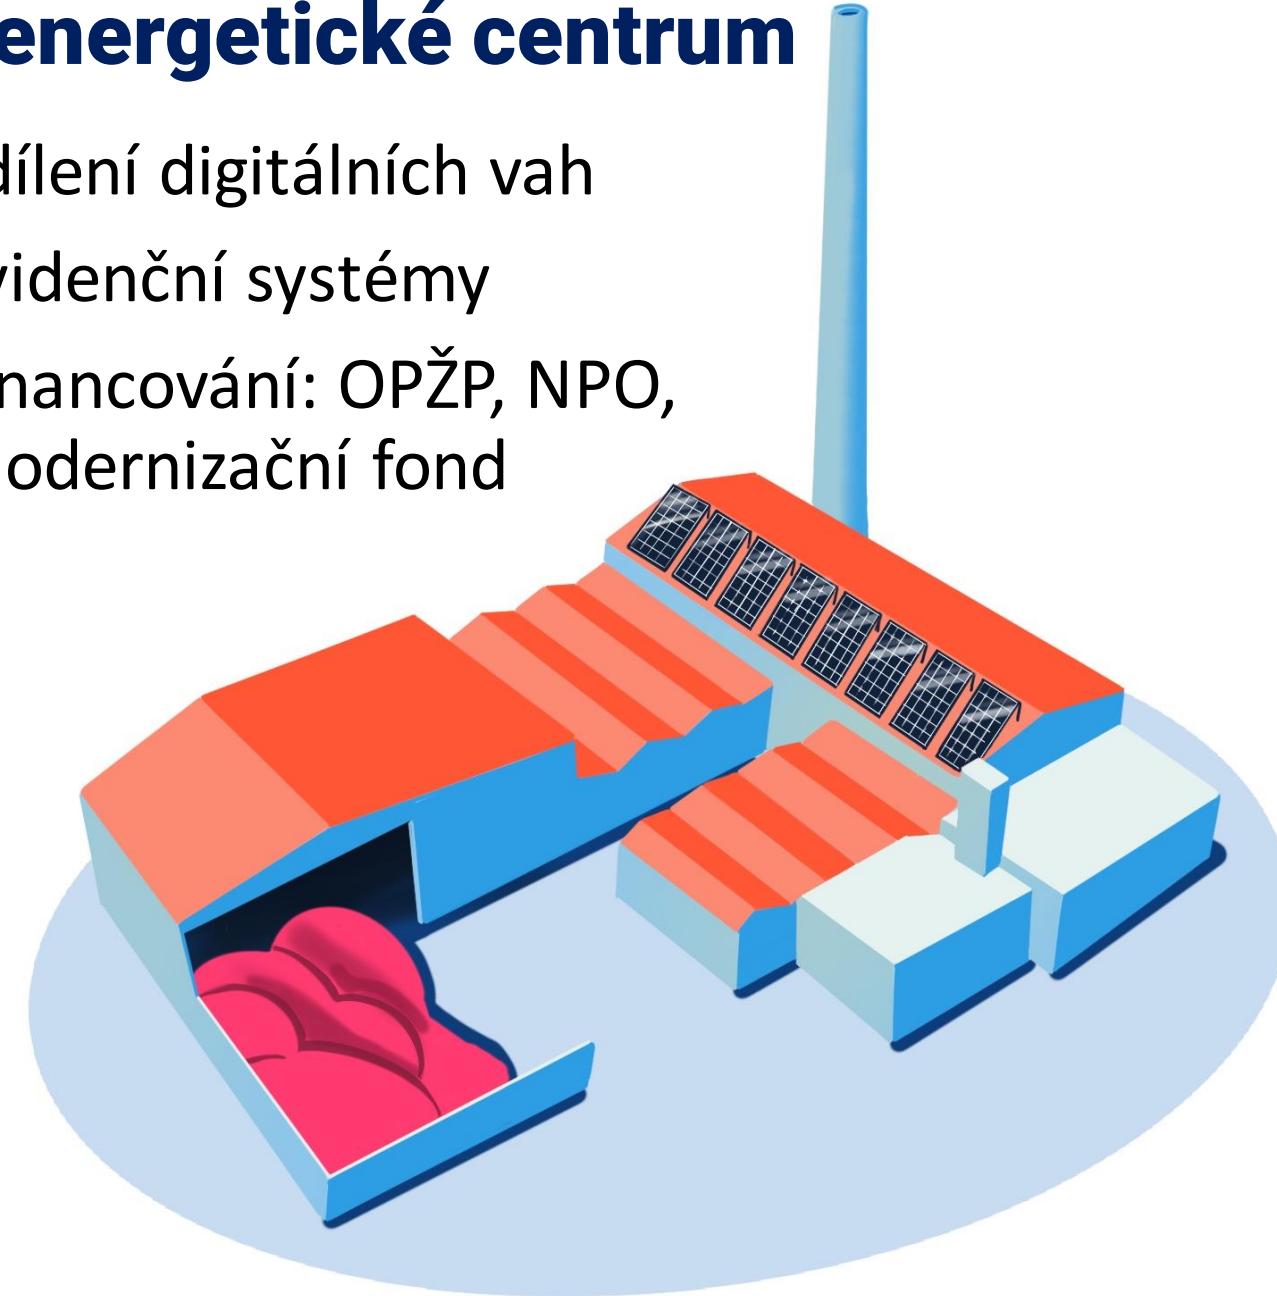

Concept „Cirkula“ – urban energy center

- Unique conversion of an old heating plant into **a modern energy and circulatory economy center**
- Combination of almost all renewable energy sources
- **Biomass** – heating of homes for 2000 inhabitants, 2 housing estates
- Electricity production in cogeneration units
- Heat pumps – summer water heating
- Solar energy – photovoltaic power plant on the roof
- Gas – only additionally
- Wind?

Koncept „Cirkula“ – městské energetické centrum

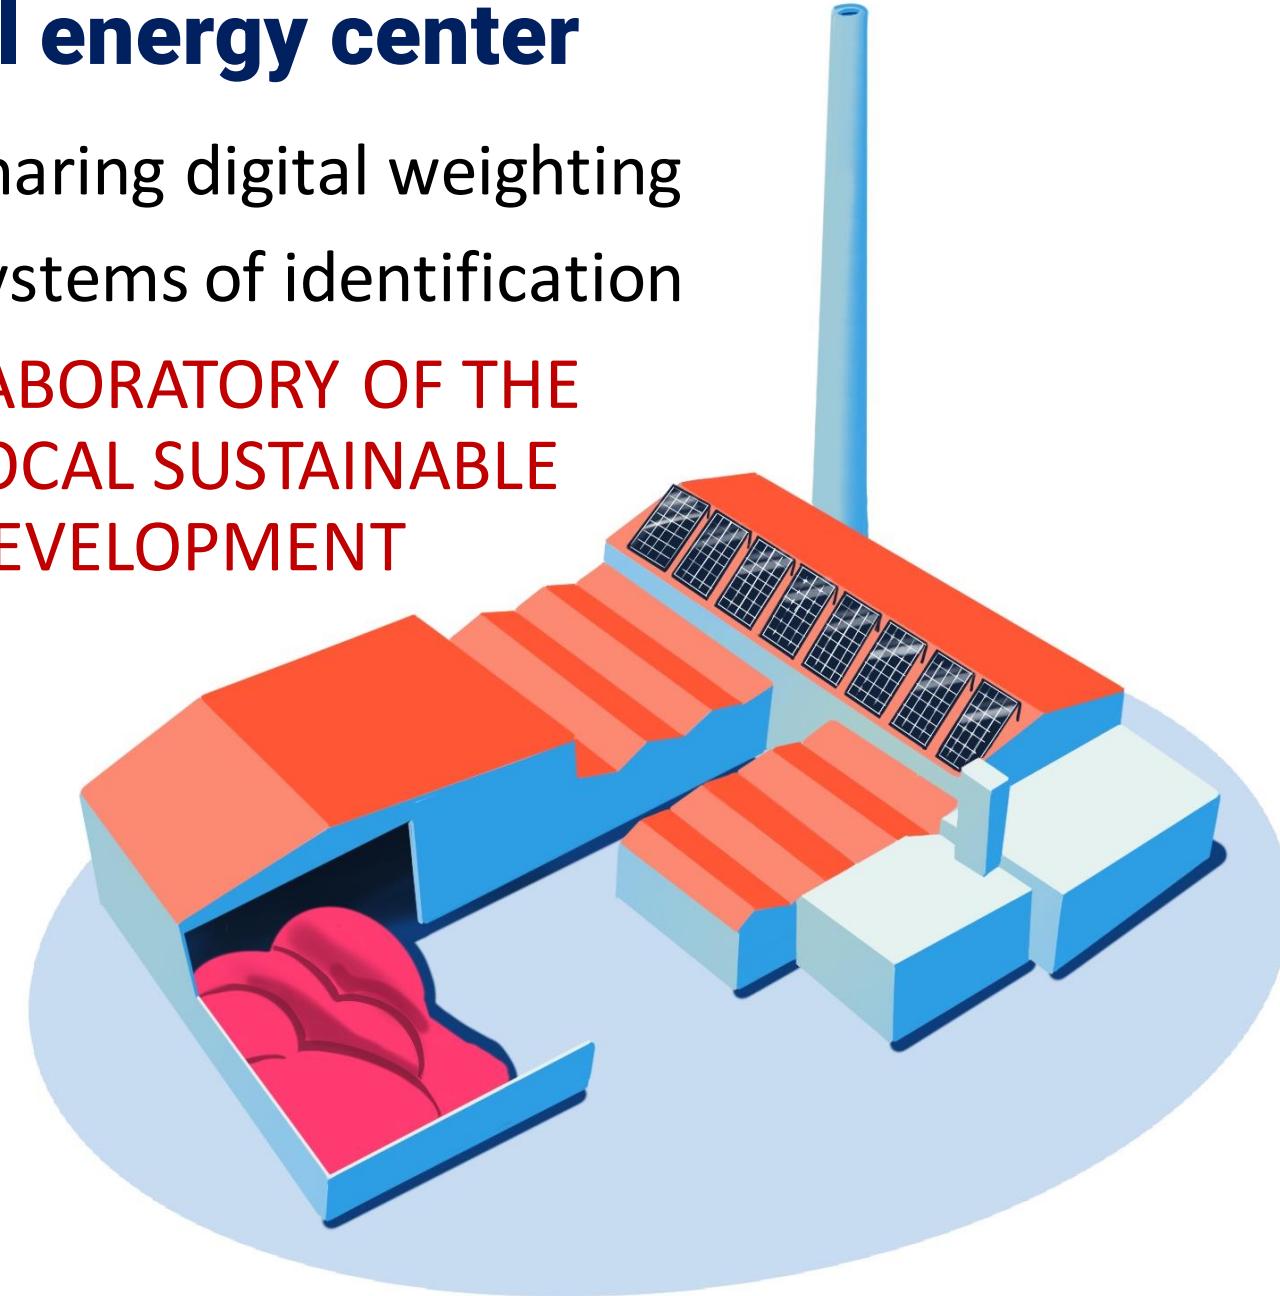

- Cirkulární koncovka
- Re-use centrum – při rekonstrukci využití demoličního odpadu
- Víceúrovňový sběrný dvůr (v přípravě) – inspirace ze Švédska
- Akumulace srážkové vody ze střech – závlaha pro zahrádkáře
- Sdílení digitálních vah
- Evidenční systémy
- Financování: OPŽP, NPO, Modernizační fond

Slavičín

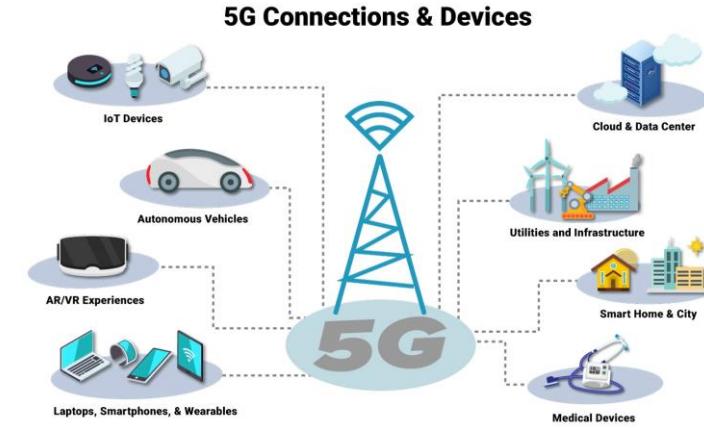

Concept „Cirkula“ – municipal energy center

- Circular facility in one building
- Re-use center – use of demolition waste for the reconstruction of former coal storage room
- Multi-level waste yard (in preparation) – inspiration from Sweden
- Accumulation of rain water from roofs – irrigation for gardens
- Sharing digital weighting
- Systems of identification
- LABORATORY OF THE LOCAL SUSTAINABLE DEVELOPMENT

Plans for the future SMART activities in Slavičín

- New SMART solutions will be based on 5G concepts
- We want to embrace support of Ministry of regional development for SMART projects
- Tight cooperation with **Technological Innovation Centre** of the Zlín region
- Main common topic: sustainable energetics, e-mobility, coworking...

TIC

Thank you for your attention
